Story

Jessica Loraine was a typical twenty year old when she inherited an old abandoned estate. By then the house had been vacant for many centuries, and rumors swirled that an ancient curse dwelt inside. Conquering her fears, Jessica and her friends set out to face the adventure head-on. However, as soon as the group crossed the threshold, the dormant evil inside the estate awakened!

Now all of Jessica's friends are prisoners in the realm of phantoms. To rescue them, travel to Africa and enlist the help of a kind sorcerer and old ancestral spirits. Under their guidance, help the spirits haunting the estate to find peace, assemble the Voodoo talisman and defeat an evil sorcerer who schemes to gain possession of Jessica's body.

Do not buy this software unless it goes below 15USD.

The controls are quite quirky and the mouse bugs more often than I get to place my sprites onto the canvas. Sometimes, the sprites get selected without clicking the mouse. Dragging sprites in the z-order doesn't do anything 50% of the time.

There are more bugs in this tool to continue. I suggest looking at Spine or Dragon Bones as alternative.. Great game with an equally great story. I would like to write all of it but lets be honest video is better, and you should watch it why i recomend this game

. This is a business simulator/tycoon game (think Theme Hospital), but instead of a hospital or theme park, it's a game dev studio.

While the premise is okay, the developer for some reason used godawful retro pixel graphics. It's 2018, pixel graphics died in the 90's when technology moved on. The choice of these kinds of graphics now is pure opportunistic laziness as developers can use this as a flimsy excuse not to hire a proper artist.

There's some irony about a game development studio being made by a game developer so lazy/cheap they can't work out how to do non-pixel art. Either way, shoddy lazy graphics ruin what could have been a decent game.. Codename: Panzers Phase Two is a great game. One of my all time favorites (and Phase I). The scenarios I saved year ago are fun to play and relive. Wish developers made scenarios still. Too bad the company was undercut (from what I've read) and major player sold out. Just reinstalled on new computer.. This game says it has Steam Cards, but it doesn't. So, if you're buying it for cheap card drops, don't, because it's false advertising.

The game has since removed its "Steam Cards" tag but it still isn't a good enough game for me to turn my frown (thumbs down) upside down (thumbs up).. Damn fun, but I honestly think this game (like mny other puzzle games) plays much better on a tablet environment with touchscreen than with a mouse.

Damn fun word game anyways.. ITS PRETTY GOOD GAME YEAH

This is most definitely the very best "Lego" inspired game. I love to be able to build any brick vehicle I can imagine, then watch as it burns to pieces as a spinning blade of death destroys the engine. Or a train depending on your preference.. This is an extremely gimped version of EF2000. No heads-down displays, inferior UI - it's basically an arcade version of that game. If you're looking for EF2000, keep looking because you will be disappointed by this game.. I'm absolutely loving this. Great, casual/puzzle gameplay loop, a lot of content (and a variety of content as well). It looks nice, runs well, plays smoothly. It's perfect for just casual play while listening to music / watching something.. I wouldn't say this game is garbage, because I could probably find a use for garbage.. Looked like the type of game I would love: Random generation, very little dialog (ain't nobody got time for that), space, shooting and loot. 3 hours of 'my wife making comments that I'm always on that damn computer' later and I'm hooked on it.. A nice, simple and easy to play football manager-simulation. Easy to pick up and very nice to play.
